

Area of Application

ESSVE Programa Frame screw drill DLT 5/14 is designed for pre-drilling window and door frames when using Programa Frame screws or Indu-Prog Frame Sleeves.

ning when drilling, the wall stud is also predrilled with a 5 mm hole. This facilitates installation. In addition, the screw acts as a guide to ensure that the Programa Frame screw is fitted straight in the frame.

Installation

The drill produces a 14 mm hole in the frame. If the frame is located in position in the ope-
