

Pielietojums

ESSVE kokskrūves ar 2 šķiedras griežņiem un ieapaļu galviņu paredzētas lielākajai daļai montāžas darbu — kokam, skaidu plāksnēm, finierim, plastmasai, dībeļiem u. c.

Apraksts

Skrūves izgatavotas no rūdīta tērauda, elektroķīmiski cinkotas vai no nerūsējošā tērauda A2 īpašiem vides apstākļiem,

piemēram, jūras videi. TX uzgalis. Skrūvēm ir viena frēzēta garenrieva un viena rierva smailē. Tas nodrošina ļoti zemu ieskrūvēšanas griezes momentu cietas koksnes materiālos un samazina plaisu veidošanos. Skrūves atbilst CE prasībām EN14592.

Montāža

leteicamais apgriezīenu skaits: 400-1200 apgr./min.

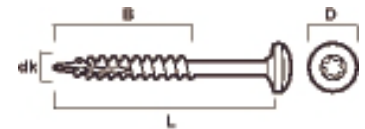

Tehniskie parametri

	Spīdīgi cinkota	Nerūsējošs tērauds
Materiāls	Rūdīts tērauds SAE C1022	Nerūsējošs tērauds A2
Virsmas apstrāde	Spīdīgi cinkota 5µm	-
Korozijizturības klase	C1	C4
Spiedes izturība, f_{uk}	-	Min. 500 MPa
Stiepes izturība, f_{yk}	-	Min. 350-400 MPa

Kokskrūves ar ieapaļu galviņu, spīdīgi cinkotas

ESSBOX, spīdīgi cinkotas
