

Area of Application

ESSVE Drywall screw Drywall are used indoors for the installation of double drywall boards on walls and ceilings. The first drywall layer is installed in the usual way with traditional drywall screws, then the second layer of drywall is glued on top and secured with the drywall screw Drywall.

Description

The screw is produced in hardened carbon steel with bright zinc plated surface treatment. It is equipped with Philips crosshead Ph2. The head shape is specially designed to not damage the cardboard/paperboard layer when anchoring the drywall panels.

Installation

Installed with a low torque for secure installation. Recommended rpm 800-1400/min.

Specification

Material	Hardened steel SAE C1018
Surface treatment	Bright zinc plated 5 µm
Corrosion category	C1
