

Area of Application

ESSVE Wafer head screw with reduced drill-point designed for the installation of light joists against light steel joists indoors. Drill capacity 0.4 – 0.9 mm.

Description

The screw is manufactured of hardened carbon steel with black phosphated surface treatment.

Specification

Material	Hardened steel SAE 1022
Surface treatment	Phosphated
Corrosion categories	C1

atment. It comes with a Philips crosshead Ph2.

As the screw has an extra low head, 1.0 mm, it is suitable for installing where extremely low inset height of the head is required.

Installation

Recommended rpm: 400-1200/min

Wafer head screw with reduced drillpoint, for light steel joists, phosphated
