

## Area of application

ESSVE Section band is designed for different types of installations and hanging from suspended ceilings. Used together with e.g. ESSVE Concrete eyes or ESSVE Key anchors.

## Description

The band is especially designed for hanging from suspended ceilings.

## Installation

The band is installed through Concrete eyes or Key anchors, against support bars in suspended ceilings. Locked using suitable fasteners.

## Specification

|                   |                  |
|-------------------|------------------|
| Material          | Steel            |
| Surface treatment | Zinc plated 5 µm |
| Length            | 10 m             |

## Section band
