

Area of application

ESSVE Stainless band designed for different types of installations and mounting in corrosivity category C4, i.e. outdoor environments or areas with high humidity and large amounts of air contamination.

Description

The band is made of stainless steel, SS 2333.

Installation

Installed using an appropriate fastener in terms of function and durability. The band 11.5x0.7 mm is suitable e.g. in ESSVE Concrete eyes.
